

**BioScience Scholars tour Diagnostic Imaging**

The Shattuck-St. Mary's BioScience Scholars Summer Camp offered a chance for 9-12 grade students to explore the Human Nervous System. The students dissected a brain, spinal cord and eye during a science lab and then visited District One Hospital to review CT and MRI images of the same. The students were offered an interactive experience with Radiologist Dr. Doyscher, Department Leader Paul Quandt and MRI Technologist Erik Zahn during their visit.
